I see that you do support republishing the Charter. Councilman Couch and this is in our communication items that we just received. Councilman Couch has put forward an ordinance resolution to deal with taking care of the republication as an ordinance. MR. So I'm not sure, okay, that you can interfere with the working of of the Clerk as though he were a department and the executive. So I'm not sure Mr. Couch studied it deeply enough. And I would probably say that's not really that's not really important what is important. Okay. The Clerk comes to you and he says that's discretion, that's a discretionary power I have. Well, I don't	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	testifiers? MS. KAHUHU: Chair, no one else has signed up. And as Dave's mentioned, the fact that their main rationale is too many, I am having a hard time with that one, too. As I watched the next two days that proceeded on their review, there was a lot of good stuff that came out of it, stuff that they brought to the table because of their position as Council Members, some of them having a longevity here in that position, and bringing to light some important things that did come through this body when we were going through our review. And so I found it to to be helpful and to give me food for thought on what I might want to change or add to our discussion here today. And, really, that's what I had hoped and thought it would be in the beginning, would be a collaborative effort. And I'm sorry I didn't I didn't really see that occur. And as I said, I was quite disillusioned by the whole process. If there be any Charter Amendment that should go forth today is to straighten that out. There's one quote in there that really grabbed me, "your Committee was reluctant to overburden the electorate with proposed changes to the Charter that could be accommodated through revisions to the Maui County Code or in" other elections or "another election cycle." As in, you know, we'll do it later, don't do it now. With that in mind well, I mean, it's just the idea that the voters can't handle 11 proposals. The last time around was like 20-something. And this is once a decade. And what happens if you were to give them, the voters, a new Charter? What happens if we were to propose a city manager form of government? I mean, that would kind of burden the public. I mean, what we're proposing here is pretty pretty simplistic, I think. I think just the basic rationale that was it was too many I've heard that in this room as well, that there's too many. And the voter that can't handle that needs to get over it. And that's all I want to say about that. CHAIR STONE: Thank you, Susan. Seems the theme here is that we feel that we had a lack of respect coming from the Council. Remember, the process is not that we go and debate with the Council on our proposals. The process is that the proposal the Council reviews and gives us recommendations, which is what happened. One of the reasons that you don't want to go and debate is because there are stacks and stacks and stacks of information, as you guys know, at home, looking back in your files piled this high. And when people are asking you for what they're going to want in specifics, you cannot give them the specifics through 	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	have and that we support. I think the concerning thing for me during that whole process was not so much the disrespect that we were being shown as a Committee, I mean, that that was obvious at some of the the comments that were made during the during the Council COMMISSIONER DELEON: Deliberations. COMMISSIONER DE REGO: deliberations as well as some of their visits to us in the districts. I mean, some of that came out. My problem and I think I did a two or three-minute diatribe and I apologize because I remember getting upset in the whole thing is the disrespect for the voter. I think that's the more important thing. The fact that the voter is not able to be able to go through Charter Amendments, State Constitution amendments you know, there are going to
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	important things that we think the public should vote on. And that's it. Yeah, there's politics through this whole thing. And there always will be. 16	(Laughter.)	16	Like the Preamble, Clifford, that whole effort

I think this is something that would require too much explanation. I don't think people would understand it. I think there would be a lot of misunderstanding of what the intent was, as it was with the Council you know, they know what's going on here that it's not appropriate to be placed as a proposal in the Charter. I will just conclude and say I don't think	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	a couple of phrases here that caught my eye in regards also in regards to the discussion whether or not this would encourage plaintiffs interested in suing the County to cast a broader net. You don't need much for plaintiffs to cast a wider net in a lawsuit. It's almost a nonargument, as far as I am concerned, in regards to that issue, you know. If somebody's going to sue somebody, they're going to sue everybody and their uncle. The broader net is usually assumed at a particular point. The other one, which I found interesting, is that your committee observed that the existing process works. But we have example a very good example where it didn't work, you know, where the two questions that were supposed to be asked and answered weren't. And that that Commissioners were actually wondering whether or not they were going to be indemnified in some way, shape or form, because of the discussion, you know.

In the spirit of compromise, I chose to support it at the time to send it through as part of the Final Report. Right now, I am on the fence. So I don't know where how I am going to vote. CHAIR STONE: Thank you, Susan. Go ahead, Dave. COMMISSIONER DELEON: I think public testimony in this was 10 to one in favor of it, at least. There was numerous people in here speaking add infinitum about	2 3 4 5 6 7 8 9 10 11 12 13	did not express being in favor of this, mostly for the cost. And I was under the impression this wasn't going to be a huge cost because it wasn't going to be a new department or a new division. And now I am hearing, and even Dave say, well, this guy in the trenches won't be doing it. Well, then, that means you're hiring somebody else who will. And so I think we're talking major cost, which, really, to me, is a change. I felt like we were making a policy statement, but that was a way to do it without it being a major new division, new department. But, obviously, there will be a big cost. You're talking czar, whatever, you're talking everyone seems to be talking about a different person. That person has to have people in the field. We are talking costs. And

What would they have done if we gave them a new Charter? I mean, seriously. I mean, you know, this is something that people can digest and, you know, there there is one or two items I dropped just out of	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	foundation, a floor, in terms of how commissions who hire and fire their directors do their job. COMMISSIONER MOIKEHA: You mentioned it was a housekeeping amendment, but I think it's an important one. They didn't say delete it. They just said it wasn't critical because they didn't want to have too many on there, I guess. I don't know. So it seems like something they looks like they do do intend that they could support. I am asking the so in our reply, I would hope that it's more than just an acceptance or rejection of what the Council has done. I think what got us into trouble in the first place is that we wasn't looking at past Charter Commission amendment reports, is that there was usually much more of a narrative explanation of why they went one way or the other. Instead of just a plain, you know, this is what the amendment is, looking at past Commission reports. It might be worth our while, as we reply to them, that we sort of give our rationale in contradistinction to their proposals, of why the Commission voted to keep these particular ones which they asked that we delete. So it's going to be more work, I know that, but I I think just sending something in as an acceptance or rejection doesn't give them something to work with in terms of what our thinking was when in terms of keeping or rejecting particular ones.
